

# Custom Program Options

**Molasses Kings Plant Juices** are first and foremost focused on delivering the ideal amount of Molasses to your plant and soil systems.

Our goal for optimum soil microbiology and plant benefits is for our customers to apply 2-5 gallons of our molasses forward Plant Juices per acre, per application.

**MIX AND MATCH** your Molasses Kings Plant Juices to accommodate your plant and soil needs!

A **1 gallon/acre** rate of application of each Molasses King Plant Juice will deliver...

- **The Sweet Heat** - 0.04oz/1000sqft of Ferrous Sulfate
- **The Mojo** - 0.02lbs/1000sqft of Nitrogen
  - This Nitrogen is for the soil microbes and not plant available source.
  - Warm season turf managers may increase the rate to supplement turf nitrogen feeding during active growing periods.
- **The Sea Sugar** - 0.14oz/1000sqft of Magesium Sulfate (along with a concentrated eklonia maxima seaweed)

Target **2-5 gallons** of Molasses Kings Plant Juices per acre, per application. Increase rates to accomodate you plant and soil specific requirements.
